**RE: AQUA VETA™ Quantum Liquid Catalyst Concentrate**

Dear Mr. Smith,

This letter is to confirm that original testing was performed on the AQUA VETA™ solution by Integrative Health Systems<sup>®</sup>, LLC's contract laboratory to determine its characteristics and categorization and I was principal investigator.

AQUA VETA™'s primary category could be as a surfactant. Surfactants are compounds that lower the surface tension (or interfacial tension) between two liquids or between a liquid and a solid. Surfactants may act as detergents, wetting agents, emulsifiers, foaming agents and dispersants.

Your all natural solution, AQUA VETA™ has an additional quality that may allow it to be in the category of a spreader-sticker, agricultural spreader adjuvant, wetting agent, soil penetrant and a possible de-duster, since it allows other compounds or natural substances to synergistically work more effectively as it helps balance the charge of the substance with its own fluxing charges of "+" and "-" molecules.

Through close evaluation, the closest solution that is comparable to AQUA VETA™ is closely related to the category of compounds known as "catalytic altered water." These types of solutions need a catalyst, but in the case of Aqua Veta,™ it does not have this occurring and allows the molecules to break down into smaller molecules as it makes water wetter.

In our studies we compared the difference between AQUA VETA™ with Catalytic Altered Water compounds and found that the molecular structure of AQUA VETA™ creates a "fluxing + and/or -" due to the electromagnetic photonic reflection of the molecule, changing its electrical fields allowing for its own self-sustaining "electromagnetic waves" to travel through space, similar to how light travels to earth's surface. The

source is not only "+" (warm) but simultaneously "-" (cold). This process then allows for a vacuum to be made within itself as the molecules implode within its own surface. This is exactly why, in processing it, one has observed "lightning bolts" or electrical magnetic dipoles coming from its manufacturing containers. Its physical properties are part of Ampere's law with Maxwell's addition and a touch of Gauss's law as the AQUA VETA™'s molecules move through its own magnetic flux so that its surface would become zero! Quite astounding!

We've discovered another important trait of AQUA VETA™ is that in a diluted solution of water, it helps create an Energetic Crystal Lattice (ECL) that will potentiate the force of the molecules, thus making it up to 100 xs more potent when comparing it to other forms of catalytic waters.

The long term sustainability and fortitude of Agri-Gro (the company you founded) has become known throughout the United States and the world for its agricultural products that have assisted local and many global farmers over the years. Agri-Gro has given farmers a choice in enhancing their current product usage, while reducing their costs. Through its use, it has allowed new generations of healthy seed stock to be harvested, as well as healthier plant sources being fed to livestock, which helps lead to better health and vitality.

Approximately 15 years ago, you decided to make a commitment to produce other innovative technologies to meet the world's future needs and that is when you gave birth to AQUA VETA™. We are at the forefront of knowing the ultimate power AQUA VETA™ may have in its future applications; in industry, municipalities, feed stocks and foods for human and animal use. Your Quantum Liquid Catalyst could help everyone reassess how we view water and its many uses throughout a demanding growing world.

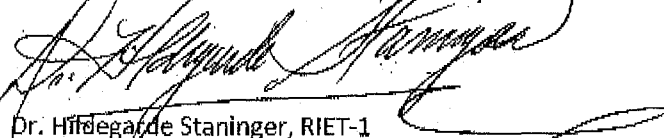

I have conducted several scientific experiments of AQUA VETA™ and have found it to be the "most interesting compound" I have ever studied, as its lead principal scientific investigator.

And, Ron just as a thought, AQUA VETA™ will act like Thor's Mighty Hammer as it hits a surface and sends energy waves throughout the area; AQUA VETA™ will do a similar rendering effect to any water miscible environment.

Thank you for your interest in our expertise and for helping reach others with new ideas and products through new and safer technologies for a needy world environment. If any of your clients would like to contact me about Aqua Veta™, please feel free to have them contact me.

Sincerely,

INTERGRATIVE HEALTH SYSTEMS, LLC
